RECEIVED
NWP PROGRAM
MARITIMES

Dear Sir,

I am ²⁰⁰³ object to a Marine Terminal being constructed in the Bay of Fundy at Whiter Cove in front of Lot # 301160 to accommodate ships for the removal of stone from a Mega Quarry which Global Quarry Products intend to construct.

It will have a negative effect on ^{the} fishing, namely herring and lobster, whales and tourism in the area. I am quite sure that it ~~is~~ is a "disaster waiting to happen", as docking a ship can be dangerous even with the assistance of tugboats but in ^{this} case tugboats are at the least "4-5" hours away.

Having lobster fished from that area in my younger years I know it can change from calm waters to a raging sea in very few minutes.

I beg of you to listen to the fishermen of this area, as I am quite confident that they know "what and why" they are concerned about this Project.

Thanking you
