Identifier	Topic	Reference to EIS/EA Report	Summary of Comment	Proponent's Response	Subsequent Comment
			<i>Date: March 2014</i>	<i>Date: June 2015</i>	
EMRB-5	Air quality, particle size	Atmospheric Environment TSD § 2.5 EIS/EA §6.1.2.1.1	The report noted that the particle size distributions were based on the relative emission rates of the size fractions. This is acceptable. Note however that the particle size categories are typically selected as the mid-point of each of the size categories, rather than 30 µm, 10 µm and 2.5 µm to represent TSP, PM ₁₀ and PM _{2.5} . What was done was not necessarily unreasonable, but the deposition and pit-retention results may be biased.	Thank you for the comment. Acknowledged.	N/A
