MNRF-5B	Accommodations/ Worker Camp, Alternative and Socio Economic		<p>If the EA is presenting a worker camp of 1200 workers, the EA needs to consider impacts of that many workers.</p> <p>The proponent needs to provide the sources of information of where the baseline information was used to determine socio economic impacts. It is not clear where in the EIS and the TSD this information is presented. Table 4.1 of the TSD does not mention impacts to hunting even though it is referenced on pg 107 where it identifies hunting pressure from works at the worker camp as a potential issue.</p> <p>MNRF appreciates that an additional evaluation of the on-site camp location was completed and provided in the addendum. MNRF supports the preferred alternative location.</p> <p>*It should be noted, that for any dispositions that require MNRF approval, additional consultation may be required if not satisfied through the EA process.</p> <p>The description of the General Land Use Area is an important policy that governs land use. It needs to be included in the EA, as well as how it was considered.</p>	<p>In response to comments from the MNRF, CMC has completed a more detailed assessment of the potential impacts of a 1,200 person camp on fishing and hunting pressure and opportunities in the Local and Regional study areas. The results of this assessment, including sources of baseline data, are provided in the attached memorandum.</p> <p>CMC appreciates the MNRF's support of the preferred alternative camp location.</p> <p>CMC understands that additional consultation with the MNRF may be required for any dispositions that require MNRF approval that may not be satisfied with the information provided in the EA.</p> <p>Attachment: Technical Memorandum: Assessment of Potential Impacts to Fishing and Hunting Pressure and Opportunities - Hammond Reef Gold Project</p>	<p>MNRF requests that the maps to be presented for Public Review show the appropriate location of the preferred alternative for the on-Site Worker Camp. As well any reference to a Public Boat Launch should be removed from the documents.</p>	<p>In the future, any map generated for public review will show the appropriate location for the preferred alternative for the on-site accommodation camp.</p> <p>Reference to a public boat launch has been removed from the memorandum attachment.</p> <p>Attachment: Technical Memorandum: Assessment of Potential Impacts to Fishing and Hunting Pressure and Opportunities - Hammond Reef Gold Project; Revision 1</p>	N/A
