MNRF-15B	Socio economics		<p>See comment above response for MNRF #10</p> <p><i>“MNRF requests more information on the ‘no fishing policy’ that Canadian Malarctic plans to implement. Has the policy been prepared? ...how will this policy be enforced? Will this policy only pertain to Marmion Lake (upper, lower or both?) Or will the policy extend to nearby lakes too? Is the suggested questionnaire for workers who are not staying at camp, or for all workers who may be fishing in the evenings on other lakes?”</i></p> <p><i>MNRF appreciates the acknowledgment there is potential for impacts to the fishery. This needs to be included in the TDS documents.</i></p> <p><i>In order to capture the changes and impacts to existing anglers and resource based tourism, MNRF continues to suggest that CMC conduct angling effort surveys on the Marmion system, at minimum, to better understand the social-economic impacts that will be caused by the start-up of their operations.</i></p> <p><i>Regarding the restriction to access commonly used public fishing areas, it should be clarified what this means. That is, if it understood the public continue to have access to leased mine lands (which is a large portion of the LSA). Case in point – the launch site at the current camp location is no longer accessible to the public. There needs to be a clear understanding of what public access will or will not be restricted.”</i></p>	<p>In response to comments from the MNRF, CMC has completed a more detailed assessment of the potential impacts of a 1,200 person camp on fishing and hunting pressure and opportunities in the Local and Regional study areas. The results of this assessment are provided in the attached memorandum which will be submitted as part of a formal addendum to the Final EIS/EA.</p> <p>CMC will implement a bi-annual fishing and hunting effort survey of all site employees as part of an approved Project monitoring program to evaluate effect predictions. The design of the survey will be reviewed with MNRF following Project approval. A commitment to conduct bi-annual hunting and fishing survey is included in the Project commitments registry.</p> <p>Attachment: Technical Memorandum: Assessment of Potential Impacts to Fishing and Hunting</p>	<p>MNRF requests that the maps to be presented for Public Review show the appropriate location of the preferred alternative for the on-Site Worker Camp. As well any reference to a Public Boat Launch should be removed from the documents.</p>	<p>In the future, any map generated for public review will show the appropriate location for the preferred alternative for the on-site accommodation camp.</p> <p>Reference to a public boat launch has been removed from the memorandum attachment.</p> <p>Attachment: Technical Memorandum: Assessment of Potential Impacts to Fishing and Hunting Pressure and Opportunities - Hammond Reef Gold Project; Revision 1</p>	N/A
