Inset Map: West Pine Proposed Tenure Quarry Local Study Area

Map Legend

Subsistence Use Values (harvesting locations only):

- Deer
- Caribou
- Bear
- Moose
- Elk
- Rabbit
- Mule deer
- Pickerel or walleye
- Other fur bearer

Real Map Features:

- Subsistence Use Reference Map
- Proposed tenures (red)
- Compact Limbs
- Earth material
- Water source
- Subsistence Use line
- Subsistence Use base
- Natural gas pipeline
- Drinking water sources
- Food plants
- Firewood
- Roads
- Limited use roads
- Subsistence Use areas
- Inset Map area

Study Results

This map indicates the west pine proposed tenures quarry local study area.

Map produced by Steven DeRoy of the Firelight Group on Thursday, November 3, 2011.

Base map data originates from BC Hydro, the National Topographic System, Geobase, and Geogratis (Natural Resources Canada). Map projected to UTM, Zone 10, NAD 83.

This map does not capture the complexity of Treaty 8 First Nation’s relationship to their traditional lands or the extent of the practice of treaty and aboriginal rights. This map is a living document and is intended to be amended and refined over time.

The data used to produce this map originate from multiple sources. This map is property of the Treaty 8 Tribal Association and may only be reproduced with written permission.

Inset Map: West Pine Proposed Tenure Quarry Local Study Area

Treaty 8 Tribal Association Map Note:
This map has been developed by Doig River, Halfway River, Prophet River and West Moberly First Nations for use in negotiations with BC Hydro over a Traditional Land Use Study (TLUS) Agreement and for no other purpose. It does not represent the extent of the four First Nations’ traditional territories or the extent of the lands over which they exercise their section 35(1) rights, both historically and presently.

Areas shown provide the best available representation of known investigation areas and project components for the Site C Project as of June 2011. The areas for the dam and generating facilities, associated facilities and working areas correspond to the updated design in the project description report. As the preliminary design advances refinements, reductions and/or additions to these areas should be expected.

Existing transportation features:
- Existing transmission corridor
- Proposed clearing roads - existing upgrade
- Proposed clearing roads - existing non-upgrade

Temporary project components:
- Dam construction area
- Proposed diversion tunnels and associated works
- Proposed coffer dams - stage 1
- Proposed coffer dams - stage 2
- Proposed excavations and relocations
- Proposed construction facilities
- Proposed excavations for construction materials
- Proposed one-time clearing (14 m.)
- Proposed access roads - new - temporary

Permanent project components:
- Proposed dam, generating station and associated structures
- Proposed reservoir
- Proposed widening transmission corridor (35 m.)
- Proposed access roads - new - permanent
- Proposed new transmission corridor
- Proposed access roads - existing

BC Hydro Note:
Areas shown do not capture the complexity of Treaty 8 First Nation subjects mentioned in the Addison Declaration of the extent of treaty and aboriginal rights.

The data used to produce this map originate from multiple sources. This map is property of the Treaty 8 Tribal Association and may only be reproduced with written permission.
